THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The described work piece was manufactured in a few specimens in the Stalin Airframe Plant in KULBYSHEV-BEZIMYANKA (50°15' 00"E/55°12'00"N). [redacted] these work pieces were designed for use in jet engines.

2. Description of this work piece (see Annex): Material: 2 mm sheet metal, length about 850 mm, diameter about 850 mm, apertures from 300 to 850 mm in diameter. The work piece consisted of two cases about 100 mm apart. The space between these cases was subdivided into 4 or 6 circular chambers. After completion, the work pieces were burned until black.

**Comment :**

The purpose of the sketched work piece cannot be definitely determined. It may represent an inaccurate reproduction of the inner and outer ring of a thrust nozzle. If it should be the cell casing of a jet engine it would indicate that, besides the MIG-9 (twin-jet) series, at least single specimens of another model fitted with one power plant were built.

1 Annex: Work Piece Manufactured at the KUIB'SHEV Aircraft Plant No. 1/18.

This document is hereby regraded to **CONFIDENTIAL** in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
